

CSPT® Exam Medications List

A

acetaminophen injection
acetazolamide sodium injection
acetic acid irrigant
acetylcysteine injection
acyclovir sodium injection
adalimumab
adenosine injection
albumin human injection
allopurinol injection
alprostadil
alteplase recombinant injection
amikacin sulfate injection
amino acid injection (general formulations)
aminophylline (theophylline ethylenediamine) injection
amiodarone HCl injection
amphotericin B cholesteryl sulfate complex
amphotericin B deoxycholate injection
amphotericin B lipid complex
amphotericin B liposome
ampicillin injection
ampicillin sodium/sulbactam sodium injection
antithymocyte globulin (rabbit) injection
argatroban injection
asparaginase injection
atracurium besylate injection
atropine sulfate injection
azathioprine sodium injection
azithromycin injection
aztreonam injection

B

bendamustine HCl injection
betamethasone sodium phosphate/betamethasone acetate injection

Italicized drugs are included on ISMP's List of High-Alert Medications in Acute Care, Community and Ambulatory Healthcare, and Long-Term Care (LTC) Settings.

bevacizumab injection
bivalirudin injection
bleomycin sulfate injection
bupivacaine injection (HCl and liposomal)

C

calcium chloride injection
calcium gluconate injection
carbamazepine injection
carboplatin injection
caspofungin acetate injection
cefazolin sodium injection
cefepime HCl injection
cefotaxime sodium injection
cefotetan disodium injection
cefoxitin sodium injection
ceftazidime injection
ceftriaxone sodium injection
cefuroxime sodium injection
chloramphenicol sodium succinate injection
chlorpromazine HCl injection
ciprofloxacin injection
cisplatin injection
clindamycin phosphate injection
cyclophosphamide injection
cyclosporine injection
cytarabine injection (conventional and liposomal)

D

dacarbazine injection
dactinomycin injection
daptomycin injection
daunorubicin citrate liposomal injection
daunorubicin HCl injection
deferoxamine mesylate injection
dexamethasone sodium phosphate injection
dexmedetomidine HCl injection
dextrose injection

Italicized drugs are included on ISMP's List of High-Alert Medications in Acute Care, Community and Ambulatory Healthcare, and Long-Term Care (LTC) Settings.

diazepam injection
digoxin injection
dihydroergotamine mesylate injection
diltiazem HCl injection
dimercaprol injection
diphenhydramine HCl injection
dobutamine HCl injection
docetaxel injection
dopamine HCl injection
doxorubicin HCl injection (conventional and liposomal)
doxycycline hyclate injection

E

enalaprilat injection
enoxaparin sodium injection
ephedrine sulfate injection
epinephrine injection
epoetin alfa recombinant (erythropoietin) injection
epoprostenol sodium injection
eptifibatide injection
ertapenem sodium injection
estradiol cypionate injection
etoposide injection

F

famotidine injection
fat emulsion intravenous
fentanyl citrate injection
filgrastim injection
fluconazole injection
fludarabine phosphate injection
flumazenil injection
fluorouracil injection
fluphenazine injection
folic acid injection
fomepizole injection

Italicized drugs are included on ISMP's List of High-Alert Medications in Acute Care, Community and Ambulatory Healthcare, and Long-Term Care (LTC) Settings.

fondaparinux sodium injection
foscarnet sodium injection
fosphenytoin sodium injection
furosemide injection

G

gadoterate meglumine injection
ganciclovir sodium injection
gemcitabine HCl injection
gentamicin sulfate injection
glucagon injection

H

haloperidol decanoate injection
haloperidol lactate injection
heparin sodium injection
hydralazine HCl injection
hydrocortisone sodium succinate injection
hydromorphone HCl injection
hydroxocobalamin injection

I

ibuprofen injection
ifosfamide injection
imipenem/cilastatin sodium injection
infliximab injection
insulin aspart
insulin degludec
insulin degludec and aspart
insulin detemir
insulin glargine
insulin glulisine
insulin isophane (NPH)
insulin isophane (NPH) and regular
insulin lispro
insulin regular
interferon alfa-2b

Italicized drugs are included on ISMP's List of High-Alert Medications in Acute Care, Community and Ambulatory Healthcare, and Long-Term Care (LTC) Settings.

interferon alfa-n3

iohexol injection

irinotecan injection (HCl and liposomal)

iron dextran injection

isoniazid injection

isoproterenol HCl injection

K

ketamine HCl injection

ketorolac tromethamine injection

L

labetalol HCl injection

leucovorin calcium injection

leuprolide acetate injection

levofloxacin injection

levothyroxine sodium injection

lidocaine HCl injection

lidocaine HCl/epinephrine injection

lorazepam injection

M

magnesium sulfate injection

mannitol injection

medroxyprogesterone acetate injection

meperidine HCl injection

meropenem injection

methadone HCl injection

methotrexate injection

methyldopate HCl injection

methylene blue injection

methylprednisolone acetate injection

metoclopramide HCl injection

metoprolol tartrate injection

metronidazole injection

midazolam HCl injection

milrinone lactate injection

Italicized drugs are included on ISMP's List of High-Alert Medications in Acute Care, Community and Ambulatory Healthcare, and Long-Term Care (LTC) Settings.

morphine injection (sulfate and liposomal)

moxifloxacin HCl injection

multivitamins parenteral (MVI)

mycophenolate mofetil HCl injection

N

naftillin sodium injection

naloxone HCl injection

natalizumab injection

neostigmine methylsulfate injection

nitroglycerin injection

nitroprusside sodium injection

norepinephrine bitartrate injection

O

octreotide acetate injection

ondansetron HCl injection

oxacillin sodium injection

oxaliplatin injection

oxytocin injection

P

paclitaxel injection (conventional and protein-bound)

pancuronium bromide injection

pantoprazole sodium injection

pegaspargase injection

peginterferon alfa-2a

peginterferon alfa-2b

penicillin G benzathine

penicillin G potassium

penicillin G procaine

pentobarbital sodium injection

pentostatin injection

phenobarbital sodium injection

phenylephrine HCl injection

phenytoin sodium injection

phytonadione (vitamin K) injection

Italicized drugs are included on ISMP's List of High-Alert Medications in Acute Care, Community and Ambulatory Healthcare, and Long-Term Care (LTC) Settings.

piperacillin sodium/tazobactam sodium injection
potassium acetate injection
potassium chloride injection
potassium phosphate injection
procainamide HCl injection
prochlorperazine edisylate injection
progesterone injection
promethazine HCl injection
propofol injection
propranolol HCl injection
protamine sulfate injection
pyridostigmine bromide injection

Q

quinupristin/dalfopristin injection

R

ranitidine injection
rifampin injection
risperidone injection
rituximab injection
rocuronium bromide injection

S

scopolamine (hyoscine) hydrobromide injection
sodium acetate injection
sodium chloride injection
sodium ferric gluconate complex injection
sodium lactate injection
sodium nitrate/sodium thiosulfate injection
sodium phosphate injection
succinylcholine chloride injection
sulfamethoxazole/trimethoprim injection

T

tacrolimus injection
tenecteplase recombinant injection

Italicized drugs are included on ISMP's List of High-Alert Medications in Acute Care, Community and Ambulatory Healthcare, and Long-Term Care (LTC) Settings.

testosterone injection
theophylline injection
tobramycin injection
trace elements combinations injection
tranexamic acid injection
trastuzumab injection
tuberculin purified protein derivative injection

V

valproate sodium injection
vancomycin HCl injection
vasopressin injection
vecuronium bromide injection
verapamil HCl injection
vinblastine sulfate injection
vincristine sulfate injection (and liposome)
vinorelbine tartrate injection
voriconazole injection

W

warfarin sodium injection

Z

zinc sulfate injection
ziprasidone mesylate injection

Italicized drugs are included on ISMP's List of High-Alert Medications in Acute Care, Community and Ambulatory Healthcare, and Long-Term Care (LTC) Settings.
